Experience

PygenicArc , Front-end Developer Nov 2025 – Jan 2026

- Worked as a Front-End Developer, building responsive web interfaces using React.js and JavaScript, and gained hands-on experience with PostgreSQL for database integration.
- Served as Team Lead, coordinating tasks, guiding team members, and ensuring timely delivery of project milestones.

Education

Excellent English High School June 2019 – April 2020

- SSLC : 88

The National PU college June 2020 – April 2022

- PUC(PCMB) : 88

KS School of Engineering and Management, VTU Dec 2022 – June 2026

- Bachelor of Engineering (CSE) CGPA: 9.13

Projects

Sahasika - Crime Reporting Website

- Built a full-stack application using Flask and MySQL to enable anonymous crime reporting, strengthening community safety with secure data handling.
- Streamlined user interactions, earning faculty recognition for exceptional usability and data integrity in academic evaluations.

Carbon Gauge

- Designed a front-end web platform to monitor corporate carbon footprints, promoting environmental awareness with engaging visuals.
- Implemented responsive UI components and interactive dashboards to visualize carbon footprint data, improving usability and user engagement for sustainability tracking.

The Sentient Spectrum

- Built the front-end interface for The Sentient Spectrum, a hackathon project that visualizes real-time AI consciousness through dynamic, color-coded visual auras representing different AI subsystems.
- Designed and implemented responsive, real-time UI components and animations to reflect changing AI confidence, reasoning, and emotion-like states, enabling an immersive and intuitive user experience.

TascGo - An AI Powered Project Management Tool

- Designed and developed TascGo, an AI-powered web-based project management tool using the MERN stack, featuring task creation, assignment, progress tracking, Kanban boards, calendar views, role-based access, and real-time collaboration.
- Integrated an AI chatbot assistant with NLP capabilities to automate task creation, provide smart reminders, summarize project updates, and improve productivity for students, freelancers, and small teams.

Skills

Web Development: HTML, CSS, Java Script and React.js (Basics), Django and Flask (Familiarity)

Languages: Java , Python

Database Management: SQL , PostgreSQL , MongoDB

AI & Prompt Engineering: ChatGPT Prompt Engineering, AI Utilization

Project Tools: Agile, Scrum, Jira

Certifications

SQL - HackerRank

Demonstrated proficiency in SQL fundamentals including queries, joins, and data retrieval.

Python For Web Development - Udemy

Built and deployed web applications using Python, focusing on backend logic, routing, and database integration.

Applied AI: Practical Implementations – TechSaksham

Gained hands-on experience in applying AI concepts to real-world use cases, focusing on practical implementation and problem-solving.

Key Achievements

Academic - Won 1st Place at a State-Level Project Exhibition (RVITM) for TascGo and 4th Place at the MEVI Technologies Hackathon (KSSEM) for Carbon Gauge. .

Cultural - Secured Third Place in the Kannada Quiz Event organized by VTU and hosted college programs.

NSS Volunteer - Conducted awareness activities and interacted with students at a Government School in Sugganahalli, promoting education and social responsibility.

Coordinator – KSSEM Idea Club - Organized and managed idea-pitching sessions and student activities, fostering innovation, collaboration, and creative thinking among students.
