PROFESSIONAL SUMMARY

Motivated Computer Science student with hands-on experience in Machine Learning and software development. Passionate about building scalable ML pipelines and solving real-world problems using data-driven approaches. Experienced in developing intelligent systems such as fraud detection models and web applications.

EDUCATION

KS School of Engineering and Management
Bachelor's, Computer Engineering

November 2022 - June 2026
GPA: 9.0

Vijayam Junior College
Certification, MPC

July 2020 - May 2022
GPA: 9.0

Sri Saraswati Vidya Niketan
Certification, Mathematics

March 2019 - May 2020
GPA: 9.6

PROFESSIONAL EXPERIENCE

Kodnest
Software Development Intern

January 2026 - Present
Bangalore, KA, India

- Currently working on developing and testing web applications using Core Java and modern web development concepts
- Implementing backend logic and integrating database connectivity using SQL for efficient data management
- Exploring the use of Generative AI tools and APIs to enhance application functionality
- Collaborating with team members to debug issues, optimize code, and improve overall application performance.

PROJECTS & OUTSIDE EXPERIENCE

Social Media Analysis - [Link to project](#)
Analyst

April 2025 - June 2025
Bengaluru, KA, India

- Conducted sentiment analysis on social media data using Python to extract insights into user opinions and trends
- Performed data collection, preprocessing, text cleaning, and natural language processing (NLP) techniques to classify sentiments
- Visualized key results with charts and graphs to highlight patterns and actionable insights

NGOCONNECT - [Link to project](#)
Developer

April 2025 - August 2025
Bengaluru, KA, India

- Developed NGO-CONNECT, a role-based web application that brings NGOs, volunteers, and donors together on a single platform to improve collaboration and social impact
- The application supports volunteer management, donation tracking, and transparent data handling through structured workflows
- Designed with a focus on usability, scalability, and data-driven insights to enable efficient engagement and informed decision-making.

Fake Transaction Detection System

March 2024 - March 2024
Bengaluru, KA, India

- Built a Machine Learning-based fraud detection system using Python and Scikit-learn.
- Applied data preprocessing, feature engineering, and classification algorithms to detect anomalies in financial transactions with high accuracy.

SKILLS

Skills: Python, Java, SQL, JavaScript, Git, Machine Learning, HTML/CSS, Problem Solving

Development and Deployment tools: Git, Jupyter, VS Code, Vercel, Netlify, Eclipse

Languages: Hindi, Tamil, Kannada, Telugu, English
